Manager George Dern is Much Pleased With Ontlook for Old Producer.

NEW ORE BODY HOLDS OUT WELL

Is Growing Constantly in Metalic Value-Work Progressing at Sunshine.

Manager George Dern is in from the Con. Mercur, and will remain over election day. Mr. Dern says that it is some time since the old producer has shown up as well as at the present. The new strike in the old Mercur is holding out.

Imagine in the principal business before the congress will be the passing of strong resolutions favoring the establishment of a department of mines with a head in the cabinet. finely. The ore is in what is known as raise 132 in the eastern part of the mine. When first opened up the ore was base, but as drifting progressed on the body the mass began to be oxidized and values constantly increased. Three weeks ago, assays showed \$9.10 gold; two weeks ago this had increased to 19.10, and last week \$13.28. Drifting from the tunnel has been made in all Colo. from the tunnel has been made in all 160 feet without finding the limit. Mr. Dern says the body is very thick, and will supply ore to keep up the \$25,000 monthly dividend for some time to content of the first souri district, Neesho, Mo.

Mr. Dern states that the Manulug mill a still running, treating 400 tons of ore laily; a recent shipment of \$10,000 of old bullion is recorded. LODE TRANSFORMING.

Nevada Silver Camp Turns to a Gold

Producer.

The Lode district, Nye county, Nevada, has had a very active sum-mer, according to Joseph Arthur, who has just returned to Salt Lake. This district was very prolific some years ago in sliver. Prospecting has recently started for the yellow metal, and Mr. Arthur, has been successful if samples brought in by him show anything. He and his associates have made a num-ber of locations and are making preparntions to develop their property. He states that the Old Illinois mine formerly a big silver producer is being worked by Chicago parties, and is showing up some fine gold rock. ----

I have seen, and I know them all, the one showing greatest perfection in construction, besides being the most convenient to operate is the Underwood Typewriter. ROSCOE M. BREEDEN.

Buck's Hot Blast Have Double Heater Attachments

Upper rooms heated without extra expense. No loss of heat to lower room. Hot air pipe run from stove to register in upper floor. Takes cold air from floor and supplies it heated to the rooms above. Buck's Hot Blast not only saves fuel but it sends the heat where it is wanted-not up the chimney, but into the room. This great advantage is peculiar to the Buck's Stove alone. No other stove does it so well.

That's One Reason Why We Sell Only Buck's
